

ZEON Group (Overseas)

Zeon Chemicals Singapore Pte. Ltd. (ZCS)

Introduction to Zeon Chemicals Singapore Pte. Ltd.

Zeon Chemicals Singapore Pte. Ltd. (ZCS) was established as a global base for synthetic rubber in December 2010. Construction began in September 2011, and commercial production was underway by January 2014. The main areas of production are S-SBR (solution-polymerized styrene butadiene rubber) and LiBR (terminal modified butadiene rubber), which are used as materials for fuel-efficient tires.

ZCS is targeting markets throughout world, including Europe and the United States, as well as Asia. ZCS is developing alongside the growing automotive industry through the use of technology that is unique to the company.
