

ZEON Group (Overseas)

Zeon Advanced Polymix Co., Ltd. (ZAP)

Introduction to Zeon Advanced Polymix Co., Ltd.

Zeon Advanced Polymix produces rubber compounds in Thailand as part of Zeon Corporation's global synthetic rubber operations. With Thailand growing in importance as a production center for Japanese automakers, the company supplies automotive parts and industrial products to customers from Japan and Southeast Asia.

Environmental and Safety Activities

1. Work Safety Initiatives

The company is currently focusing on safety activities in an attempt to reach 1,000 consecutive days without accident. We hold an annual SAFETY WEEK event with participation by all employees, and we conduct activities to promote education and awareness about safety. We also regularly invite external lecturers to offer instruction on emergency treatment measures for injuries. We are striving to raise safety awareness by proactively dispatching staff to external safety courses.

Energy consumption (crude oil equivalent, kL)		2,933	2,807	3,277	2,948	2,705

Contributing to the Local Community

ZAP aims to coexist with the local community by inviting residents to its company health checkup, making donations of stationery supplies to surrounding elementary schools, and other activities. In fiscal 2014, we made a donation to a nearby hospital, and we received a Thank-You letter from the hospital. The company is active in many ways, holding blood donation drives, cleaning up the area around the factory, engaging in afforestation work, and making donations to public facilities. We are systematically implementing CSR training within the company in order to ensure that all employees are thoroughly aware of our CSR policy.
