近赤外吸収法によるSGCNTの肺からの排出の観察

Clearance of SGCNT from Lung Monitored by Near-IR Absorption

Clearance of single-wall carbon nanotubes from the mouse lung: a quantitative evaluation By Minfang Zhang, et. al., Nanoscale Adv., 2020, 2, 1551

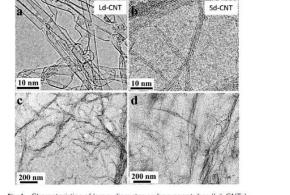

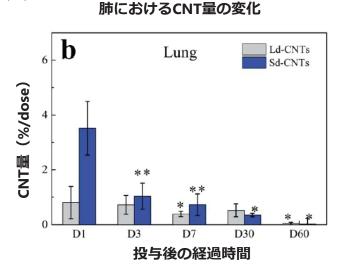

Fig. 1 Characteristics of large-diameter carbon nanotubes (Ld-CNTs) and small-diameter carbon nanotubes (Sd-CNTs). Transmission electron microscopy (TEM) images of Ld-CNTs (a), Sd-CNTs (b), and dispersions of Ld-CNTs (c) and Sd-CNTs (d) in BSA.

SGCNTに関する リスクマネジメントのための情報

Quick Summary for the Risk Management of SGCNT

◆ SGCNTは発がん物質に分類されていません(IARC)

Working Clothes

- SGCNT is not carcinogenic.
- ◆ SGCNTは哺乳類細胞に変異原性を示しません(GLP適合試験所に委託) SGCNT is not mutagenic to a mammalian cell.

焼却処理⇒ブリーチング

Incineration \Rightarrow Bleaching

- ◆ SGCNTに生殖毒性は認められていません(OECD) SGCNT is not reproductive toxicity.
- ◆ SGCNTは難分解性ではありません SGCNT is not persistent.
 - ➤ SGCNTに活性汚泥法での生分解性はありません、しかし、 SGCNT is not biodegradable when using the active sludge method of OECD test guideline, however, SGCNTは植物や動物の酸化酵素、免疫細胞を用いた生物的な方法で分解できます SGCNT is degraded by the biotic method of using immune cells and enzyme.
 - ► SGCNTを分解する土壌微生物(バクテリア)が存在します SGCNT could be degraded by soil microbe (bacteria).
 - ➤ SGCNTは生体模倣的な方法である市販の塩素系漂白剤による処理で分解できます SGCNT is degraded by the biomimetic method using commercially available bleach.
- ◆ SGCNTは生体蓄積性はありません(OECD)

SGCNT is not bioaccumulative.
