

Green Notes aroma chemical (Leaf alcohol)

March 11, 2003

The refreshing green fragrance of *cis*-3-hexenol, a representative Green Notes aroma chemical (leaf alcohol), is an essential material for presenting the experience of freshness. It also serves as the starting material for green note esters. ZEON's Green Notes aroma chemicals are widely used in such products as cosmetics, including perfumes, shampoos, and rinses, and as food additives that enrich various flavors.
